

WonkyWorks glass is handmade.

The results are often extraordinary, with pieces that appear fluid and contain a kaleidoscope of colours and variation in form and design.

WonkyWorks glass is fairly durable, but take certain precautions when storing and cleaning it. Chipped, cracked, scratched or broken glass cannot be fixed and thus must be replaced.

- Always wash WonkyWorks glass by hand. Use mild liquid dish detergent, glass cleaner, nonabrasive household cleaner and/or warm water. Water that is too hot to touch can crack the glass. Never use steel wool pads to clean.
- Store WonkyWorks glass in a safe place. To minimize the risk of breakage, do not place it in hallways or other heavy-traffic household areas. Do not store near steel or other glass items, which can scratch or damage the surface. Keep out of reach of children's hands and wagging pet tails.
- Use white office putty to stick the glass to the shelf for added stability. Save the box and padding that came with your hand blown glass for storage or mailing purposes.
- Keep WonkyWorks glass out of the microwave and away from your oven or stove. Never use them to serve really hot food or beverages.
- Wipe WonkyWorks glass items with a soft cloth, inside and out, after washing to prevent hard-water spots. To remove water spots, clean with a mixture of warm water and vinegar.
- Handcrafted glass is always delicate. It needs to be handled with care to avoid damage. Should there be any defect in the piece, please feel free to contact us and we will be happy to repair / replace it.
